Dear Sir/Madam,

I hope this letter finds you well. I would like to take this opportunity to introduce myself as a professional in the software testing domain. I graduated in June 2021 from the ADCET and pursued a Bachelor's in Technology in Computer Science with an excellent academic record. I am looking for a full-time permanent position with an esteemed organisation that allows me to employ my abilities to meet the company's vision and mission.

My curriculum, which consists of courses like Database System Design, Advanced Web Development, Data Structures, Internet of Things, Computer Organisations, Cyber Security, Big Data Analytics, and Design Thinking, has assisted me in gaining profound knowledge in the field of Computer Science.

Adapting to various work cultures, identifying bottlenecks, and prioritising have been the striking features of my working style. In addition to the above, I strongly believe in learning and sharing my knowledge with colleagues. Moreover, I stand by the point that an organisation or team can grow with all players working together. I am keen on learning and adapting new technologies to sharpen my skills at troubleshooting and solving problems.

I am confident that my background and knowledge in the computer science area, along with my strong technical skills and work ethic, will prove an important and immediate value to your organisation.

I have enclosed my resume and would appreciate an opportunity to talk with you. Should you have any further concerns or questions, please feel free to contact me. I look forward to hearing from you soon.

Cordially,

Ravikumar Lubdhi
